

PLANTS DON'T WANT CHLORINE!

WATER SYSTEMS FOR HYDROPONICS AND GARDENING

GrowMax Water Europe has engineered a complete line of Water Treatment Systems for the Hydroponics and Garden industry, providing solutions to all growers, whether casual garden hobbyists, lovers of plants, flowers and gardens, or professional cultivators.

Our Garden Filter range reduces sediment and other solids from the water as well as eliminate the principal chemical contaminant present in all waters, CHLORINE. The Garden Filter Line is designed for easy outdoor or indoor installation and use.

The **ECO GROW** and **GARDEN GROW** units include a feed water adaptor for indoor installation as well as a 3/4" BSP Garden Tap Connector for easy connection in the garden.

The **SUPER GROW** and **PRO GROW** models, with much higher flow rates, come with 3/4" Garden Hose Quick Connectors already installed, for direct connections to the garden hose or garden tap.

Benefits Include:

- **Eliminate Chlorine!**
- **Healthier Plants, Flowers, and Vegetables**
- **Easy Indoor or Outdoor Installation (DIY Product)**
- **No Waste Water, No Minimum Pressure Required**
- **Efficiency Guaranteed**

Perfect For:

- **Urban Gardens**
- **Organic Veggies**
- **Hydroponic Systems**
- **More Vibrant Flowers**
